Empathy Map Canvas:

This canvas outlines the psychological and behavioral patterns of customers to better grasp their fundamental e-commerce requirements. It promotes a design-thinking stance, reconciling user aspirations with the technical functionalities of the ShopEz MERN environment.

<u>Think & Feel</u> • Is user data and transaction info protected? • Does the physical product match the digital profile? • expecting rapid fulfillment and shipping. • Prioritizes cost-efficiency alongside product durability.	<u>See</u> • Clear, high-resolution item photography. • Comparative pricing from market rivals. • A layout that adjusts to desktop and mobile. • Automated alerts regarding dispatch and delivery.
<u>Hear</u> • Customer testimonials regarding site dependability. • Social media trends and style endorsements. • Cybersecurity advisories for online shopping. • Direct feedback from peers on app fluidity.	<u>Say & Do</u> • Signs up and explores various department catalogs. • Uses filters to pinpoint specific attributes. • Quotes: "I appreciate a rapid, one-page checkout." • Switches between gender and age-specific categories.

Pain Points

- Overly complex account creation steps.
- Latent page responsiveness on cellular networks.
- Ambiguous or outdated package tracking data.
- Difficulty navigating overcrowded filter menus.

Gains

- Optimized performance via integrated MERN logic.
- Instantaneous retrieval of product search queries.
- Unified hub for monitoring all past transactions.
- Efficient stock management for store administrators.
