

Project Design Phase

Proposed Solution Template

Date	18 June 2026
Team ID	
Project Name	ShopEz (MERN Full-Stack Application)
Student Name	Turlapati Lahari (24eg109a54@anurag.edu.in)
Maximum Marks	2 Marks

Proposed Solution Template:
The project developer shall provide the following details within the proposed solution framework.

S.No.	Parameter	Description
1.	Problem Statement (Core Issue)	Many web stores face challenges like sluggish performance on mobile, complex store navigation, and fragmented admin workflows. This leads to user frustration and inefficient stock tracking for retailers.
2.	Idea / Solution Description	ShopEz utilizes the MERN stack to create a fluid, one-page e-commerce environment. It incorporates dynamic item discovery, persistent user sessions, and a comprehensive management hub for order fulfillment.
3.	Novelty / Uniqueness	- Unified JavaScript flow across the full stack. - Automated visual asset hosting via Cloudinary. - Tailored UI experiences for distinct demographics. - End-to-end admin control from listing to delivery.
4.	Social Impact / User Value	Provides a secure and accessible digital marketplace. Prioritizes user trust through encrypted transactions, real-time inventory updates, and transparent logistics histories for every customer.
5.	Business Model (Revenue)	- Direct sales markup and platform transaction fees. - Premium subscription tiers for third-party sellers. - Revenue from prioritized product positioning.
6.	Scalability of the Solution	Built on MongoDB for effortless database scaling. Roadmap features include multi-vendor onboarding, AI-driven styling suggestions, and integration of global payment processing modules.
